1 Safety

Observe the following safety instructions.

1.1 General information

- Read this instruction manual carefully.
- Keep the instruction manual and the product information safe for future reference or for the next owner.
- Do not connect the appliance if it has been damaged in transit.

1.2 Intended use

Only use this appliance:

- for washing machine-washable fabrics and hand-washable wool in accordance with the care label.
- with tap water and commercially available detergents and care products suitable for washing machines.
- in private households and in enclosed spaces in a domestic environment.
- up to an altitude of max. 4000 m above sea level.

1.3 Restriction on user group

This appliance may be used by children aged 8 or over and by people who have reduced physical, sensory or mental abilities or inadequate experience and/or knowledge, provided that they are supervised or have been instructed on how to use the appliance safely and have understood the resulting dangers.

Do not let children play with the appliance.

Cleaning and user maintenance must not be performed by children unless they are being supervised.

Keep children under the age of 3 years and pets away from the appliance.

1.4 Safe installation

⚠ WARNING – Risk of electric shock!

Incorrect installation is dangerous.

- ▶ Connect and operate the appliance only in accordance with the specifications on the rating plate.
- ▶ Connect the appliance to a power supply with alternating current only via a properly installed socket with earthing.
- ▶ The protective conductor system of the domestic electrical installation must be properly installed. The installation must have a sufficiently large cross section.
- ▶ When using a residual current circuit breaker, only use a type with the  mark.
- ▶ Never equip the appliance with an external switching device, e.g. a timer or remote control.
- ▶ When the appliance is installed, the mains plug of the power cord must be freely accessible. If free access is not possible, an all-pole isolating switch must be installed in the permanent electrical installation according to the installation regulations.
- ▶ When installing the appliance, check that the power cable is not trapped or damaged.

If the insulation of the power cord is damaged, this is dangerous.

- ▶ Never let the power cord come into contact with hot appliance parts or heat sources.
- ▶ Never let the power cord come into contact with sharp points or edges.
- ▶ Never kink, crush or modify the power cord.

⚠ WARNING – Risk of fire!

It is dangerous to use an extended power cord and non-approved adapters.

- ▶ Do not use extension cables or multiple socket strips.
- ▶ Only use adapters and power cords approved by the manufacturer.
- ▶ If the power cord is too short and a longer one is not available, please contact an electrician to have the domestic installation adapted.

⚠ WARNING – Risk of injury!

The high weight of the appliance may result in injury when lifted.

- ▶ Do not lift the appliance on your own.

If this appliance is not correctly installed in a washer-dryer stack, the installed appliance may fall.

- ▶ Only stack the dryer on a washing machine using the connection kit from the dryer manufacturer . No other installation method is permitted.
- ▶ Do not install the appliance in a washer-dryer stack if the dryer manufacturer does not offer a suitable connection kit.
- ▶ Do not install appliances from different manufacturers and with varying depths and widths in a washer-dryer stack.
- ▶ Do not install a washer-dryer stack on a platform; the appliances may tip over.

⚠ WARNING – Risk of suffocation!

Children may put packaging material over their heads or wrap themselves up in it and suffocate.

- ▶ Keep packaging material away from children.
- ▶ Do not let children play with packaging material.

⚠ CAUTION – Risk of injury!

The appliance may vibrate or move when in use.

- ▶ Place the appliance on a clean, even, solid surface.
- ▶ Align the appliance using the appliance feet and a spirit level.

If hoses and power cords have been laid incorrectly, this causes a tripping hazard.

- ▶ Lay hoses and power cords in such a way that there is no risk of tripping.

If the appliance is moved by holding onto protruding components, such as the appliance door, the parts may break off.

- ▶ Do not move the appliance by holding onto protruding parts.

⚠ CAUTION – Risk of cutting!

Touching sharp edges on the appliance may lead to cuts.

- ▶ Do not touch the sharp edges on the appliance.

- ▶ Wear protective gloves when installing and transporting the appliance.

1.5 Safe use

⚠ WARNING – Risk of electric shock!

If the appliance or the power cord is damaged, this is dangerous.

- ▶ Never operate a damaged appliance.
- ▶ Never pull on the power cord to unplug the appliance. Always unplug the appliance at the mains.
- ▶ If the appliance or the power cord is damaged, immediately unplug the power cord or switch off the fuse in the fuse box and turn off the water tap.
- ▶ Call customer services. → *Page 55*

An ingress of moisture can cause an electric shock.

- ▶ Only use the appliance in enclosed spaces.
- ▶ Never expose the appliance to intense heat or humidity.
- ▶ Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

⚠ WARNING – Risk of harm to health!

Children can lock themselves in the appliance, thereby putting their lives at risk.

- ▶ Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- ▶ With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

⚠ WARNING – Risk of suffocation!

Children may breathe in or swallow small parts, causing them to suffocate.

- ▶ Keep small parts away from children.
- ▶ Do not let children play with small parts.

⚠ WARNING – Risk of poisoning!

Detergents and care products may result in poisoning if consumed.

- ▶ If accidentally swallowed, seek medical advice.
- ▶ Keep detergents and care products out of the reach of children.

⚠ WARNING – Risk of explosion!

Laundry that has been pretreated with cleaning agents that contain solvents may cause an explosion in the appliance.

- ▶ Rinse pretreated laundry thoroughly with water before washing.

⚠ CAUTION – Risk of injury!

The covering plate may break if you stand on or climb onto the appliance.

- ▶ Do not stand on or climb onto the appliance.

The appliance may tip over if you sit on or lean against the open door.

- ▶ Do not sit on or lean against the appliance door.
- ▶ Do not place any objects on the appliance door.

Reaching into the drum while it is still turning may cause hand injuries.

- ▶ Wait for the drum to come to a complete stop before reaching inside.

⚠ CAUTION – Risk of scalding!

When you wash at high temperatures, the detergent solution gets hot.

- ▶ Do not touch the hot detergent solution.

⚠ CAUTION – Risk of chemical burns!

If the detergent drawer is opened, detergent and care products may spray out from the appliance. Contact with eyes or skin may cause irritation.

- ▶ Rinse eyes and/or skin thoroughly with clean water if they come into contact with detergents or care products.
- ▶ If accidentally swallowed, seek medical advice.
- ▶ Keep detergents and care products out of the reach of children.

1.6 Safe cleaning and maintenance

⚠ WARNING – Risk of electric shock!

Improper repairs are dangerous.

- ▶ Never make any technical modifications to the appliance or its features.
- ▶ Repairs to the appliance should only be carried out by trained specialist staff.
- ▶ Only use genuine spare parts when repairing the appliance.
- ▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

An ingress of moisture can cause an electric shock.

- ▶ Before cleaning, pull out the mains plug or switch off the fuse in the fuse box.
- ▶ Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

⚠ WARNING – Risk of injury!

The use of non-original spare parts and non-original accessories is dangerous.

- ▶ Only use the manufacturer's original spare parts and original accessories.

⚠ WARNING – Risk of poisoning!

Poisonous fumes may be given off if you use cleaning agents that contain solvents.

- ▶ Do not use cleaning agents that contain solvents.

2 Preventing material damage

ATTENTION!

The functionality of the appliance may be impaired if you use the wrong quantity of fabric softener, detergent, care product or cleaning agent.

- ▶ Follow the dosage recommendations from the manufacturer.

Exceeding the maximum load capacity impairs the function of the appliance.

- ▶ Observe the maximum load capacity for each programme and do not exceed it.

→ "Programmes", Page 26

The appliance is secured for transportation using transit bolts. Transit bolts which have not been removed may result in material damage and damage to the appliance.

- ▶ Before starting up the appliance, remove the transit bolts completely and keep them in a safe place.
- ▶ Before transport, fit the transit bolts fully in order to prevent damage in transit.

Material damage may be caused if the water inlet hose is connected incorrectly.

- ▶ Tighten the screw connections on the water inlet until they are hand-tight.
- ▶ Connect the water inlet hose directly to the water tap, without any additional connecting elements such as adapters, extensions or valves.
- ▶ Make sure that the valve housing for the water inlet hose does not come into contact with its surroundings and is not subjected to any external forces.
- ▶ Ensure that the inner diameter of the water tap is at least 17 mm.

- ▶ Make sure that the length of the thread on the connection to the water tap is at least 10 mm.

If the water pressure is too high or too low, the appliance may not be able to operate properly.

- ▶ Ensure that the water pressure in the water supply system is at least 100 kPa (1 bar) and max. 1000 kPa (10 bar).
- ▶ If the water pressure exceeds the maximum value specified, a pressure-reducing valve must be installed between the drinking water connection and the hose set of the appliance.
- ▶ Do not connect the appliance to the mixer tap of an unpressurised hot-water boiler.

Modified or damaged water hoses may result in material damage and damage to the appliance.

- ▶ Never kink, crush, modify or cut through water hoses.
- ▶ Only use the water hoses supplied with the appliance or genuine spare hoses.
- ▶ Never re-use water hoses that have been used before.

Operating the appliance using water that is dirty or too hot may lead to material damage and damage to the appliance.

- ▶ Only operate the appliance with cold mains water.

Unsuitable cleaning products may damage the surfaces of the appliance.

- ▶ Do not use harsh or abrasive detergents.
- ▶ Do not use cleaning products with a high alcohol content.
- ▶ Do not use hard scouring pads or cleaning sponges.
- ▶ Clean the appliance with nothing but water and a soft, damp cloth.

- ▶ Remove all detergent residue, spray residue or other residues immediately if they come into contact with the appliance.

3 Environmental protection and saving energy

3.1 Disposing of packaging

The packaging materials are environmentally compatible and can be recycled.

- ▶ Sort the individual components by type and dispose of them separately.

3.2 Save energy and conserve resources

If you follow these instructions, your appliance will use less electricity and less water.

Choose programmes with low temperatures and longer wash times and use maximum load capacity.

- ✓ Energy consumption and water consumption is most efficient.

Add detergent based on the laundry's degree of soiling.

- ✓ For light to normal soiling, a smaller amount of detergent is sufficient. Observe the dosage recommendation from the detergent manufacturer.

Reduce the washing temperature for lightly and normally soiled laundry.

- ✓ At lower temperatures, the appliance consumes less energy. For light to normal soiling, lower temperatures than indicated on the care label are also sufficient.

Set the maximum spin speed if you want to dry the laundry in the tumble dryer afterwards.

- ✓ The drier the laundry, the shorter the programme duration when drying which, in turn, reduces energy consumption. A higher spin speed reduces the residual moisture in the laundry and increases the volume of the spin noise.

Wash the laundry without prewash.

- ✓ Washing with prewash increases the programme duration and increases energy and water consumption.

The appliance has a continuous automatic load adjustment function.

- ✓ Depending on the type of fabric and load capacity, the continuous automatic load adjustment function optimally adjusts the water consumption and programme duration.

3.3 Energy saving mode

If you do not use the appliance for an extended period, it automatically switches to energy-saving mode.

Energy-saving mode ends when you use the appliance again.

If you do not continue operating the appliance, it automatically switches to standby mode.

4 Installation and connection

4.1 Unpacking the appliance

ATTENTION!

Objects remaining in the drum that are not designed for operation with the appliance may cause material damage and damage to the appliance.

- ▶ Remove these objects, along with all supplied accessories, from the drum before starting the appliance.

1. Remove any packaging and protective covers completely from the appliance.

→ *"Disposing of packaging"*,
Page 11

2. Check the appliance for visible damage.
3. Open the door.
4. Remove any accessories from the drum.
5. Close the door.

4.2 Contents of package

After unpacking all parts, check for any damage in transit and completeness of the delivery.

ATTENTION!

If the appliance is operated with incomplete or defective accessories, the appliance may not be able to operate properly, or this may result in material damage or damage to the appliance.

- ▶ Do not operate the appliance with incomplete or defective accessories.

- ▶ Replace the accessories in question before operating the appliance.

→ *"Accessories"*, Page 30

Note: The appliance has been tested at the factory to check it is in working order. As a result, water stains may remain in the appliance. These marks will disappear after the first wash cycle.

The delivery consists of the following:

- Washing machine
- Accompanying documents
- Transit bolts
→ *"Removing the transit bolts"*,
Page 13
- Cover caps
- Elbow for securing the water outlet hose

4.3 Requirements for the installation location

WARNING

Risk of electric shock!

The appliance contains live parts. Touching live parts is dangerous.

- ▶ Do not operate the appliance without a cover cap.

WARNING

Risk of injury!

When using the appliance on a base, the appliance may tip over.

- ▶ Always secure the feet of the appliance to a base using the manufacturer's fixing brackets → *Page 30* before using the appliance for the first time.

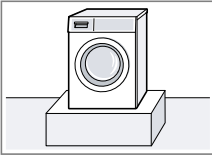

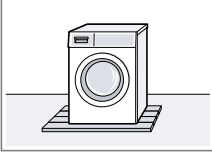

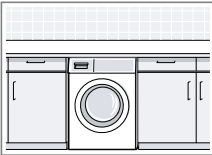

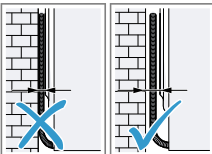

ATTENTION!

If residual water in the appliance freezes, this may cause damage to the appliance.

- ▶ Do not install or operate this appliance anywhere that is liable to experience frost or outdoors.

If the appliance is tilted at an angle greater than 40°, residual water may leak out of the appliance and cause material damage.

- ▶ Tilt the appliance carefully.
- ▶ Transport the appliance in an upright position.

Installation location	Requirements
Base 	Secure the appliance with fixing brackets → Page 30.
Wooden joist floor 	Place the appliance on a water-resistant wooden board (minimum thickness of 30 mm) which is screwed tightly to the floor.
Kitchen unit 	Only install the appliance underneath a continuous worktop that is securely connected to adjacent cabinets. Required niche width: 60 cm.
Against a wall 	Do not trap the power cord or the hoses between the wall and the appliance.

4.4 Removing the transit bolts

The appliance is secured for transportation using transit bolts on the rear of the appliance.

Note: Keep the transit bolt screws and the sleeves in a safe place for future transport.

→ "Inserting the transit bolts", Page 54

1. Pull the hoses out of the holders.

2. Unscrew ① and remove ② all of the screws for the 4 transit bolts using a WAF 13 wrench.

en Installation and connection

3. Remove the power cable from the holder.

4. Remove the 4 sleeves.

5. Put on the 4 cover caps.

6. Push the 4 cover caps downwards.

Note: To install the transit bolts to transport the appliance, perform these steps again in the reverse order.

4.5 Connecting the appliance

Connecting the water inlet hose

⚠ WARNING
Risk of electric shock!

The appliance contains live parts. Touching live parts is dangerous.

- ▶ Do not immerse the electrical AquaStop valve in water.

1. Connect the water inlet hose to a tap (26.4 mm = 3/4").

2. Open the water tap carefully and check that the connection points are tight.

Water outlet connection types

This information is intended to help you to connect this appliance to the water outlet.

ATTENTION!

When draining, the water outlet hose is subject to water pressure and may come loose from the installed connection point.

- ▶ Secure the water outlet hose against unintentional loosening.

Note: Observe the draining heights. The maximum draining height is 100 cm.

Siphon

Secure the connection point with a (24–40 mm) hose clamp.

Sink

Fix and secure the water outlet hose with an elbow.

Plastic pipe with rubber sleeve or gully

Fix and secure the water outlet hose with an elbow.

Connecting the appliance to the electricity supply

Note: Your electrical domestic installation for this appliance must comply with the local legal provisions and

safety regulations, and should include a residual current circuit-breaker.

1. Insert the mains plug of the appliance's power cable in a socket nearby.

The connection details of the appliance can be found under Technical data → *Page 58*.

2. Check the mains plug is inserted properly.

4.6 Aligning the appliance

In order to reduce noise and vibration and to prevent the appliance from moving, align the appliance correctly.

1. Use a WAF 17 wrench to loosen the lock nuts in a clockwise direction.

en Installation and connection

2. To align the appliance, turn the appliance feet. Check that the appliance is level using a spirit level.

All appliance feet must stand firmly on the ground.

3. Use a WAF 17 wrench to tighten the lock nuts against the housing until they are hand-tight.

In doing so, hold the foot tight and do not adjust its height.

5 Familiarising yourself with your appliance

5.1 Appliance

You can find an overview of the parts of your appliance here.

On certain models, specific details such as the colour and shape may differ from those pictured.

1 Maintenance flap for the drain pump → *Page 40*

2 Door

3 Detergent drawer → *Page 17*

4 Control panel → *Page 18*

5 Water outlet hose → *Page 15*

6 Power cord → *Page 15*

7 Transit bolts → *Page 13*

8 Water inlet hose → *Page 14*

5.2 Detergent drawer

Note: Observe the manufacturer's instructions on the use and dosage of the detergent and care product and the information in the programme descriptions.

en Familiarising yourself with your appliance

- 1** Measuring aid for liquid detergent
→ "Inserting the measuring aid for liquid detergent",
Page 32
- 2** Dispenser II: detergent for the main wash
- 3** Compartment ⌘: Fabric softener
- 4** Compartment I: Detergent for prewash

5.3 Control panel

You can use the control panel to configure all functions of your appliance and to obtain information about the operating status.

- 1** Programmes → Page 26
- 2** Programme selector
→ Page 31
- 3** Buttons and display
→ Page 21

5.4 Operating logic

Some areas of the display are buttons and respond to touch. You can activate, deactivate or change set-

tings by pressing the buttons. The activated settings are highlighted brightly on the display.

ATTENTION!

Pressing on the display with force may cause damage.

- ▶ Do not apply heavy pressure on the display.
- ▶ Do not press on the display using pointed or sharp objects.

Displaying or hiding additional buttons

Some buttons are hidden for a reduced display. If you display these additional buttons on the display, you can activate or deactivate the corresponding settings.

1. To display the additional buttons, briefly press **More**.

- ✓ The display shows all additional buttons.

2. To hide the additional buttons, briefly press **More** again.

Changing a setting value

If you activate certain settings, the display shows selection buttons and you can change the setting value.

- ▶ Press the selection buttons
→ *Page 23*.

The display shows the setting value.

6 Before using for the first time

Prepare the appliance for use.

6.1 Starting an empty washing cycle

Your appliance was inspected thoroughly before leaving the factory. To remove any residual water, run the first wash cycle without any laundry.

1. Press .

The switch-on process takes a few seconds.

2. Select the **Cottons 90°C**  programme or the drum cleaning programme in the Home Connect app.
3. Close the door.
4. Pull out the detergent drawer.

en Before using for the first time

5. Add washing powder containing oxygen bleach to compartment II.

To prevent foaming, use only half of the amount of detergent recommended by the detergent manufacturer for light soiling. Do not use detergent suitable for woollens or delicates.

6. Push in the detergent drawer.
 7. Press **II ▶** to start the programme.
- ✓ The display shows the remaining programme duration.
 - ✓ After the programme has ended, the display shows: **End**.
8. Start the first wash cycle or press **⏻** to put the appliance in standby mode.

→ "Basic operation", Page 31

7 Display

The display shows the current settings, options or relevant information.

Note: Additional functions may be available as a result of software updates. If a software update is available, you can find further information in the Home Connect app.

Example: Display

 Pre-Soaking	<ul style="list-style-type: none"> ■ Activate ■ Deactivate 	<p>Activate or deactivate soaking. → <i>"Soaking laundry"</i>, Page 33 Before the main wash cycle starts, the laundry remains in the water for longer. For laundry with particularly stubborn soiling. After the soaking cycle, the programme pauses for 15 minutes to allow laundry to be added.</p>

9 Programmes

Notes

- The laundry's care labels provide you with additional information on programme selection.
- Additional functions may be available as a result of software updates. If a software update is available, you can find further information in the Home Connect app.

Programme	Description	Max. load (kg)
Cottons 	Wash hard-wearing items made of cotton, linen or blended fabrics. Also suitable as a short programme for normally soiled laundry when you activate  SpeedPerfect. Programme setting: <ul style="list-style-type: none"> ■ Max. 90 °C ■ Max. 1600 rpm 	10.0 5.0 ¹
 Cottons Eco 	Wash hard-wearing items made of cotton, linen or blended fabrics. Energy-saving programme. Note: To save energy, the actual washing temperature may deviate from the set washing temperature. The washing performance meets legal requirements. Programme setting: <ul style="list-style-type: none"> ■ Max. 90 °C ■ Max. 1600 rpm 	10.0
Easy Care 	Wash items made from synthetic or blended fabrics. Programme setting: <ul style="list-style-type: none"> ■ Max. 60 °C ■ Max. 1400 rpm 	4.0
Mix 	Wash items made from cotton, linen, or synthetic or blended fabrics. Suitable for lightly soiled laundry. Programme setting: <ul style="list-style-type: none"> ■ Max. 60 °C ■ Max. 1600 rpm 	4.0

¹  **SpeedPerfect** activated

² Washing not possible

Programme	Description	Max. load (kg)
Delicates/Silk 	Wash delicate, washable items made from silk, viscose and synthetic fabrics. Use a detergent that is suitable for delicates or silk. Note: Wash especially delicate items or items with hooks, eyelets or clips in a mesh laundry bag. Programme setting: <ul style="list-style-type: none"> ■ Max. 40 °C ■ Max. 800 rpm 	2.0
 Wool 	Hand- or machine-washable items that are made from wool or contain wool. To prevent the laundry from shrinking, the drum moves the items very gently with long pauses. Use a detergent that is suitable for wool. Programme setting: <ul style="list-style-type: none"> ■ Max. 40 °C ■ Max. 800 rpm 	2.0
 Rinse	Rinse and then spin the laundry, and drain the water. Programme setting: Max. 1600 rpm	–
 Spin/Drain 	Spin the laundry and drain the water. If you only want to drain the water, activate 0. The laundry is not spun. Programme setting: Max. 1600 rpm	–
App 	Select additional programmes directly via the Home Connect app. A description of the programmes can be found in the Home Connect app. Note: Your appliance must be connected to your home network and registered in your Home Connect app. → "Home Connect ", Page 35	–
 Hygiene Plus	Wash hard-wearing items made of cotton, linen or blended fabrics. Suitable for allergy sufferers and for strict hygiene requirements. Note: Once the set temperature has been reached, it remains constant throughout the entire washing process.	6.5

10 Accessories

Use original accessories. These have been made especially for your appliance.

Note: Some accessories are available in other colours. Contact → "Customer Service", Page 55.

	Use	Order number
Water inlet hose extension	Extend the water inlet hose for cold water or AquaStop (approx. 2.50 m).	WMZ2381
Fixing brackets	Improves the stability of the appliance.	WMZ2200
Liquid detergent insert	Measure liquid detergent.	00605740
Platform	Install the appliance at a raised height so that it can be easily loaded and unloaded.	WMZP-W20W
Washing machine cleaners	Cleaning products for maintaining the appliance interior.	00311929

11 Laundry

11.1 Preparing the laundry

ATTENTION!

Objects remaining in the laundry may damage the laundry and the drum.

- ▶ Remove all items from any pockets in your laundry before using the appliance.

Note

The appliance and fabrics are protected when you prepare your laundry.

- Brush off sand and soil
- Sort the laundry according to colour and textiles and observe the care labels
- Close all zips, Velcro fasteners, hooks and eyes
- Tie cloth belts, cloth straps and cords together

- Remove curtain fittings and lead strips
- Wash small or particularly delicate items in a mesh washing bag
- Wash large and small items of laundry together
- Wash laundry with fresh stains immediately
- Pretreat laundry with dried stains and wash several times
- Load the laundry unfolded into the drum
- Before loading the drum, any laundry that has been pre-treated with chlorine bleach should be rinsed several times

12 Detergents and care products

The manufacturer's instructions for use and dosage can be found on the packaging.

Notes

- When using liquid detergents, only use liquid detergents that are self-flowing
- Do not mix different liquid detergents
- Do not mix detergent and fabric softener
- Do not use products that have expired or are highly congealed
- Do not use products containing solvents, caustic agents or volatile substances
- Do not use chlorine bleach
- Do not use dyes regularly as fixing salt can damage stainless steel
- Do not use color-bleaching agents in the appliance

13 Basic operation

13.1 Switching on the appliance

Note: If you switch the appliance on the first time after you have connected it to the electrical system, the switch-on process takes up to one minute.

Requirement: The appliance has been correctly installed and connected.

→ "Installation and connection", Page 12

- ▶ Press .

The switch-on process takes a few seconds.

Note: The lighting for the drum goes out automatically.

13.2 Setting a programme

1. Press the required programme.
→ "Programmes", Page 26

- ✓ The display shows the programme settings.
2. If required, adjust the programme settings.
→ "Adjusting the programme settings", Page 32

Setting additional programmes

Requirement: Home Connect is set up.

→ "Setting up Home Connect", Page 35

1. Set the **App**  programme.
If  **Remote Start** flashes,
2. Press  **Remote Start**.
The Home Connect app displays the programmes that can be selected.
3. Set a programme in the Home Connect app.
4. If required, adjust the programme settings.
→ "Adjusting the programme settings", Page 32
5. Start the programme.
→ "Starting the programme", Page 33

13.3 Adjusting the programme settings

Requirement: A programme has been set.

→ "Setting a programme", Page 31

- ▶ Adjust the programme settings.
→ "Buttons", Page 23

Observe the information about operating logic → Page 18.

Note: The programme settings are not saved permanently for the programme.

13.4 Loading laundry

Note: To prevent creasing, note the maximum load for the programmes.

→ "Programmes", Page 26

Requirements

- The laundry is prepared and sorted.
→ "Laundry", Page 30
- The drum is empty.

1. Open the door.
2. Place the laundry in the drum.
3. Close the door.

Ensure that there is no laundry trapped in the door.

13.5 Inserting the measuring aid for liquid detergent

If you order the measuring aid as an accessory, you must use the measuring aid.

1. Pull out the detergent drawer.

2. Press down on the insert and remove the detergent drawer.

3. Insert the measuring aid.

4. Insert the detergent drawer.

13.6 Use the measuring aid for liquid detergent

To add liquid detergent, you can use a measuring aid in the detergent drawer.

1. Pull out the detergent drawer.

- Slide the measuring aid forwards.

- Fold the measuring aid down and click it into place.

- Push in the detergent drawer.

13.7 Adding detergent and care product

Notes

- Do not use the measuring aid for liquid detergent for gel detergents, washing powder, or if Prewash or "Ready in" time are activated.
 - Observe the information about detergents and care products → Page 31.
- Pull out the detergent drawer.
 - Pour in detergent.
→ "Detergent drawer", Page 17
 - If required, add the care product.
 - Push in the detergent drawer.

13.8 Starting the programme

Requirement: A programme is set.
→ "Setting a programme", Page 31

- Press **II ▷**.
- The drum rotates and load detection takes place. This can take up to 2 minutes, after which water enters the drum.
- The display shows the programme duration or the programme end time.
- After the programme has ended, the display shows: **End**.

13.9 Soaking laundry

To soak the laundry, activate the soaking before the programme start.

Note: Add the detergent for the soaking cycle in compartment I and the detergent for the main wash in compartment II of the detergent drawer.
→ "Detergent drawer", Page 17

Requirements

- The laundry is placed in the appliance.
→ "Loading laundry", Page 32
- A programme is set.
→ "Setting a programme", Page 31
- The display shows all additional buttons.
→ "Operating logic", Page 18

- Press **☑ Pre-Soaking**.
→ "Buttons", Page 25
- Start the programme.
→ "Starting the programme", Page 33

After the soaking time, a signal sounds and **II ▷** flashes.
The door lock is released.

Note: If you want to add laundry, follow the instructions on the display.
→ "Display", Page 22

- To continue the programme, press **II ▷** or wait for approx. 15 minutes.

13.10 Adding laundry

After the programme starts, you can remove or add laundry depending on the programme status.

1. Press **II ▷**.

The appliance pauses.

Note: If you want to add laundry, follow the instructions on the display.

→ *"Display", Page 22*

2. Open the door.
3. Add or remove laundry.
4. Close the door.
5. Press **II ▷**.

13.11 Cancelling the programme

1. Press **II ▷**.
2. Open the door.

The appliance door remains locked for safety reasons if the temperature and water levels are high.

- If the temperature is high, start the **Rinse** programme.
 - If the water level is high, start the **Spin** programme or select a suitable programme for draining.
- *"Programmes", Page 26*

3. Remove the laundry.
→ *"Unloading the laundry", Page 34*

13.12 Resuming the programme when the programme status is Rinse Hold

Requirements

- Rinse Stop is activated.
→ *"Buttons", Page 24*
 - The last rinse cycle of the set programme has ended and the laundry is in the rinsing water.
1. Set the **Spin** programme or a programme for draining the water.
→ *"Programmes", Page 26*
 2. Press **II ▷**.

13.13 Unloading the laundry

1. Open the door.
2. Remove the laundry from the drum.

13.14 Put the appliance into standby mode

1. Press **⏻**.
2. Wipe the rubber gasket dry and remove any foreign objects.

3. Leave the appliance door and detergent drawer open so that residual water can evaporate.

14 Childproof lock

Secure your appliance against being operated unintentionally using the controls.

14.1 Activating the childproof lock

- ▶ Press and hold  **3 sec.** for approx. 3 seconds.
- ✓ The control elements are locked.
- ✓ The childproof lock also remains activated when the appliance is in standby mode and in the event of a power cut.

14.2 Deactivating the childproof lock

Requirement: To deactivate the childproof lock, the appliance must be switched on.

- ▶ Press and hold  **3 sec.** for approx. 3 seconds.

15 Home Connect

This appliance is network-capable. Connecting your appliance to a mobile device lets you control its functions via the Home Connect app, adjust its basic settings and monitor its operating status.

The Home Connect services are not available in every country. The availability of the Home Connect function depends on the availability of Home Connect services in your country. You can find information about this at: www.home-connect.com.

The Home Connect app guides you through the entire login process. Follow the instructions in the Home Connect app to configure the settings.

Tips

- Please consult the documents supplied by Home Connect.
- Please also follow the instructions in the Home Connect app.

Notes

- Please note the safety precautions in this instruction manual and make sure that they are also observed when operating the appliance via the Home Connect app. → "Safety", Page 4
- Operating the appliance on the appliance itself always takes priority. During this time it is not possible to operate the appliance using the Home Connect app.

15.1 Setting up the Home Connect app

1. Install the Home Connect app on your mobile device.
2. Start the Home Connect app and set up access for Home Connect. The Home Connect app guides you through the entire login process.

15.2 Setting up Home Connect

Requirements

- The Home Connect app has been installed on your mobile device.
 - Wi-Fi has been activated on the router.
 - The appliance is receiving signals from the WLAN home network (Wi-Fi) at its installation location.
1. Press and hold  **Remote Start** for approx. 3 seconds.
 2. Follow the instructions in the Home Connect app.

15.3 Home Connect menu

The Home Connect menu contains all of the Home Connect settings.

Calling up the Home Connect menu

- ▶ Press and hold  **Remote Start** for at least 3 seconds.
- ✓ The display shows the first setting of the Home Connect menu.

Navigating in the Home Connect menu

- ▶ Briefly press  **Remote Start** until the display shows the required setting.

Exiting the Home Connect menu

- ▶ Press and hold  **Remote Start** for at least 3 seconds.

15.4 Activating Wi-Fi on the appliance

Requirements

- The Home Connect menu is called up.
→ *"Calling up the Home Connect menu", Page 36*
- The display shows "oFF".
- ▶ Press  to change the setting.
- ✓ The display shows "on" if the Wi-Fi is activated.

Note: If the Wi-Fi is activated, the display alternately shows "on" and the signal strength of the Wi-Fi connection.

15.5 Deactivating Wi-Fi on the appliance

Requirements

- The Home Connect menu is called up.
→ *"Calling up the Home Connect menu", Page 36*
- The display shows "on".
- ▶ Press  to change the setting.
- ✓ The display shows "oFF" if the Wi-Fi is deactivated.

15.6 Resetting the appliance network settings

Requirements

- The Home Connect menu is called up.
→ *"Calling up the Home Connect menu", Page 36*
- The display shows **rEs**.
- ▶ Press and hold  for at least 3 seconds.
- ✓ The network settings are reset.

15.7 Remote start

Enable the appliance for remote start via the Home Connect app.

Note

Remote start is deactivated for safety reasons in the following circumstances:

- The appliance door is opened.
-  **Remote Start** is pressed.
- Following a power cut.

Activating remote start

Requirements

- The appliance is connected to your home WiFi network.
- The appliance is connected to the Home Connect app.
- A programme is selected.
- The appliance door is closed.

- ▶ Press  **Remote Start**.
- ✓  **Remote Start** lights up and the appliance is enabled for remote start via the Home Connect app.

Deactivating remote start

- ▶ Press  **Remote Start**.
- ✓  **Remote Start** goes out.

15.8 Remote diagnostics

Customer Service can use Remote Diagnostics to access your appliance if you contact them, have your appliance connected to the Home Connect server and if Remote Diagnostics is available in the country in which you are using the appliance.

Tip: For further information and details about the availability of Remote Diagnostics in your country, please visit the service/support section of your local website: www.home-connect.com.

15.9 Data protection

Please see the information on data protection.

The first time your appliance is registered on a home network connected to the Internet, your appliance will transmit the following types of data to the Home Connect server (initial registration):

- Unique appliance identification (consisting of appliance codes as well as the MAC address of the Wi-Fi communication module installed).
- Security certificate of the Wi-Fi communication module (to ensure a secure data connection).
- The current software and hardware version of your appliance.
- Status of any previous reset to factory settings.

This initial registration prepares the Home Connect functions for use and is only required when you want to use the Home Connect functions for the first time.

Note: Please note that the Home Connect functions can only be utilised with the Home Connect app. Information on data protection can be retrieved in the Home Connect app.

16 Basic settings

You can configure the basic settings for your appliance to meet your needs.

16.1 Overview of the basic settings

Note: Additional functions may be available as a result of software updates. If a software update is available, you can find further information in the Home Connect app.

Position	Basic setting	Selection	Description
1	End signal	0 (off) 1 (quiet) 2 (medium) 3 (loud) 4 (very loud)	Set the volume of the signal at the end of the programme.
2	Button signal	0 (off) 1 (quiet) 2 (medium) 3 (loud) 4 (very loud)	Set the volume of the signal tone emitted when the buttons are pressed.
3	Display brightness	1 (low) 2 (medium) 3 (high) 4 (very high)	Set the display brightness.
5	Drum cleaning reminder	On OFF	Activate or deactivate the reminder to clean the drum.
6	Programme counter		Display the number of finished programmes.
7	Factory settings	rES	Restore the appliance to the factory settings.

16.2 Changing the basic settings

Requirement: The display shows all additional buttons.

→ "Displaying or hiding additional buttons", Page 19

1. To call up the basic settings, press  **Basic Settings**.
2. Select the required basic setting.
→ "Overview of the basic settings", Page 38
3. Adjust the basic setting:
 - To change the value, press  or .
 - To reset the appliance to the factory settings, press and hold  for approx. 3 seconds.
4. Press  **Basic Settings** to save the settings.

17 Programme counter

The program counter displays the number of finished programmes.

17.1 Calling up the programme counter

1. Press  **Basic Settings**.
2. Set the programme to position 6.

18 Cleaning and servicing

To keep your appliance working efficiently for a long time, it is important to clean and maintain it carefully.

18.1 Cleaning the drum

CAUTION **Risk of injury!**

Permanently washing at low temperatures and a lack of ventilation for the appliance may damage the drum and cause injury.

- ▶ Regularly run a programme for cleaning the drum or wash at temperatures of at least 60 °C.
- ▶ Leave the appliance to dry after every operation with the door open, and leave the detergent drawer to dry.
- ▶ Select the **Cottons 90°C**  programme or the drum cleaning programme in the Home Connect app.
Run the programme without laundry but with washing powder that contains oxygen bleach or a cleaning agent for caring for the inside of the appliance.
→ "Accessories", Page 30

18.2 Cleaning the detergent drawer

1. Pull out the detergent drawer.

en Cleaning and servicing

2. Press down on the insert and remove the detergent drawer.

3. Pull out the insert upwards.

4. Clean the detergent drawer and insert with water and a brush, and then dry them.

5. Fit the insert and click it into place.

6. Clean the opening for the detergent drawer.

7. Push in the detergent drawer.

18.3 Cleaning the drain pump

Clean the drain pump regularly, at least once a year, as well as in the event of faults, e.g. blockages or rattling noises.

Emptying the drain pump

1. Turn off the tap.
2. Put the appliance into standby mode.
→ "Put the appliance into standby mode", Page 34
3. Disconnect the appliance's mains plug from the power supply.

4. Open and remove the maintenance flap.

5. Slide a sufficiently large container under the opening.

6. Take the drain hose out of the holder.

7. **⚠ CAUTION - Risk of scalding!**
When you wash at high temperatures, the detergent solution gets hot.
▶ Do not touch the hot detergent solution.

To allow the detergent solution to flow out into the container, remove the sealing cap.

8. Firmly press on the sealing cap.

9. Insert the drain hose into the holder.

Cleaning the drain pump

Requirement: The drain pump is empty. → Page 40

1. Since water may remain in the drain pump, unscrew the pump cap carefully.
 - The filter insert in the pump housing may become stuck due to coarse particles of dirt. Loosen the dirt and remove the filter insert.

2. Clean the interior, the thread on the pump cap and the pump housing.

The pump cap is comprised of two parts which can be taken apart for cleaning.

3. Ensure that both impellers can turn.

4. Insert the pump cap.
 - Ensure that the parts of the pump cap are correctly assembled.

5. Screw the pump cap as far as it will go.

The handle on the pump cap must be in a vertical position.

6. Insert and close the maintenance flap.

18.4 Cleaning the intake opening in the rubber gasket

Regularly check the intake opening in the rubber gasket for any blockages and clean the intake opening.

1. Open the appliance door.
2. Remove any blockages from the intake opening.

Note: Do not use any sharp or pointed objects.

19 Troubleshooting

You can rectify minor faults on your appliance yourself. Read the troubleshooting information before contacting after-sales service. This will avoid unnecessary costs.

WARNING

Risk of electric shock!

Improper repairs are dangerous.

- ▶ Repairs to the appliance should only be carried out by trained specialist staff.
- ▶ Only use genuine spare parts when repairing the appliance.
- ▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

Fault	Cause and troubleshooting
The display goes out and II ▶ flashes.	Energy-saving mode is active <ul style="list-style-type: none"> ▶ Press II ▶. ✓ The display lights up again.

Fault	Cause and troubleshooting
Banging noises, rattling in the drain pump.	Foreign bodies have got into the drain pump. ▶ → "Cleaning the drain pump", Page 40
Slurping, rhythmical suction noise.	The drain pump is active, the detergent solution is pumped out. ▶ Not a fault – normal operating noise.
Creasing.	The spin speed is too high. ▶ The next time you run a wash cycle, set a lower spin speed.
	The load is too large. ▶ The next time you run a wash cycle, reduce the amount of laundry being loaded.
	Unsuitable programme for the type of fabric. ▶ Select the programmes that are suitable for the type of fabric.
Detergent or fabric softener drips off the seal and collects on the door or in the seal fold.	Too much detergent/fabric softener in the detergent drawer. ▶ When dosing liquid detergent and fabric softener, observe the marking in the detergent drawer and do not dose above this.
The spin result is not satisfactory. The laundry is too wet/too damp.	A low spin speed is selected. ▶ The next time you run a wash cycle, set a higher spin speed. ▶ Start the  Spin programme.
	Drain pipe or water outlet hose is blocked. ▶ Clean the drain pipe and the water outlet hose.
	Drain pipe or water drain hose is caught or jammed. ▶ Ensure that the drain pipe and water drain hose are not kinked or trapped.
	The unbalanced load detection system has interrupted the spin cycle because the laundry is unevenly distributed. ▶ Redistribute the laundry in the drum. Note: Where possible, mix large and small items in the drum. Different sized items of laundry distribute themselves better during the spin cycle. ▶ Start the  Spin programme.
	Unbalance load detection system is using a reduced spin speed to eliminate an unbalance. ▶ Redistribute the laundry in the drum.

Fault	Cause and troubleshooting
The spin result is not satisfactory. The laundry is too wet/too damp.	<p>Note: Where possible, mix large and small items in the drum. Different sized items of laundry distribute themselves better during the spin cycle.</p> <ul style="list-style-type: none"> ▶ Start the  Spin programme.
Detergent residue on the damp washing.	<p>Detergents may contain water-insoluble substances that deposit on the laundry.</p> <ul style="list-style-type: none"> ▶ Start the  Rinse programme.
Detergent residue on the dry laundry.	<p>Detergents may contain water-insoluble substances that deposit on the laundry.</p> <ul style="list-style-type: none"> ▶ Brush out the laundry after washing and drying.
Home Connect is not working properly.	<p>Different causes are possible.</p> <ul style="list-style-type: none"> ▶ Go to www.home-connect.com.
No connection to the home network.	<p>Wi-Fi is switched off.</p> <ul style="list-style-type: none"> ▶ Activating Wi-Fi on the appliance. → <i>"Activating Wi-Fi on the appliance", Page 36.</i> <p>Wi-Fi is activated but a connection to your home network cannot be established.</p> <ol style="list-style-type: none"> 1. Ensure that the home network is available. 2. Reconnect the appliance to the home network. → <i>"Setting up Home Connect", Page 35</i>
Water is leaking out at the water inlet hose.	<p>Water inlet hose is not correctly/securely connected.</p> <ol style="list-style-type: none"> 1. Connect the water supply hose correctly. → <i>"Connecting the water inlet hose", Page 14</i> 2. Tighten the screw connection.
Water is leaking out at the water outlet hose.	<p>The water outlet hose is damaged.</p> <ul style="list-style-type: none"> ▶ Replace the damaged water outlet hose. <hr/> <p>Water outlet hose is not connected correctly.</p> <ul style="list-style-type: none"> ▶ Connect the water outlet hose correctly. → <i>"Water outlet connection types", Page 15</i>
Odours have formed in the appliance.	<p>Humidity and detergent residue may promote the formation of bacteria.</p> <ul style="list-style-type: none"> ▶ → <i>"Cleaning the drum", Page 39</i> ▶ If you are not using the appliance, leave the door and detergent drawer open so that residual water can evaporate.
Damp stains have formed on the fabrics after the end of the  Steam programme.	<p>Water droplets from the drum or from the door have moistened the fabrics. The drops come from either condensed steam or the residual moisture from the previous wash programme.</p> <ul style="list-style-type: none"> ▶ Iron the fabrics or hang them up to dry.

Fault	Cause and troubleshooting
Fabric softener remains in the detergent drawer.	The use of fabric softener is not supported for the selected programme. <ul style="list-style-type: none">▶ Before washing, check whether the use of fabric softener is supported for the selected programme. → <i>"Programmes", Page 26</i>
Water is leaking from below the door.	Dirt on the door or seal causes leaks. <ul style="list-style-type: none">▶ Clean the door and the seal.

19.1 Emergency release

Releasing the door

Requirement: The drain pump is empty. → *Page 40*

1. **ATTENTION!** Escaping water may cause material damage.
 - ▶ Do not open the door if you can see water through the glass.
- Pull the emergency release downwards with a tool and release.

- ✓ The door lock is released.
2. Insert the maintenance flap and lock it into place.
3. Close the maintenance flap.

20 Transportation, storage and disposal

20.1 Removing the appliance

1. Turn off the tap.
2. Empty the water inlet hose.
3. Put the appliance into standby mode.
 - *"Put the appliance into standby mode"*, *Page 34*
4. Unplug the appliance's mains plug.
5. Drain the water.
 - *"Cleaning the drain pump"*, *Page 40*
6. Detach the hoses.

20.2 Inserting the transit bolts

Secure the appliance before transportation using transit bolts in order to prevent transport damage.

1. Use a screwdriver to remove the 4 cover caps.

Keep the cover caps.

2. Insert the 4 transit bolts.
 - *"Removing the transit bolts"*, *Page 13*

20.3 Using the appliance again

- ▶ For further information, see
 - *"Installation and connection"*, *Page 12* and
 - *"Starting an empty washing cycle"*, *Page 19*.

20.4 Disposing of old appliance

Valuable raw materials can be re-used by recycling.

WARNING

Risk of harm to health!

Children can lock themselves in the appliance, thereby putting their lives at risk.

- ▶ Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- ▶ With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

1. Unplug the appliance from the mains.
2. Cut through the power cord.
3. Dispose of the appliance in an environmentally friendly manner.

Information about current disposal methods are available from your specialist dealer or local authority.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

21 Customer Service

Detailed information on the warranty period and terms of warranty in your country is available from our after-sales service, your retailer or on our website.

If you contact Customer Service, you will require the product number (E-Nr.), the production number (FD) and the consecutive numbering (Z-Nr.) of your appliance.

The contact details for Customer Service can be found in the enclosed Customer Service directory or on our website.

21.1 Product number (E-Nr.), production number (FD) and consecutive numbering (Z-Nr.)

You can find the product number (E-Nr.), the production number (FD) and the consecutive numbering (Z-Nr.) on the appliance's rating plate.

Depending on the model, the rating plate is located:

- On the inside of the door.
- On the inside of the maintenance flap.
- On the rear of the appliance.

Make a note of your appliance's details and the Customer Service telephone number to find them again quickly.

21.2 AQUA-STOP guarantee

In addition to warranty claims against the seller under the purchase agreement and in addition to our manufacturer's warranty, we offer compensation under the following conditions.

- If our Aqua-Stop system is defective and causes water damage, we will make good the damage for

private users. To ensure protection from water damage, the appliance must be connected to the power supply.

- The liability guarantee is valid for the service life of the appliance.
- A claim can only be made under the guarantee if the appliance has been correctly installed and connected with Aqua-Stop according to our instructions; this also includes correctly fitting the Aqua-Stop extension (genuine accessory). Our guarantee does not cover defective supply lines or fittings up to the Aqua-Stop connection on the tap.
- If your appliance is fitted with Aqua-Stop, you can in principle leave your appliance unattended during operation and the tap turned on afterwards. The tap only needs to be turned off if you are away from home for a long period, e.g. on holiday for several weeks.

22 Consumption values

The indicated consumption values are approximate.

The values may deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type of laundry, amount and soiling of laundry, detergent used, fluctuations in the mains voltage and selected settings.

Programme	Temperature (°C)	Load (kg)	Energy consumption (kWh) ¹	Water consumption (l) ¹	Programme duration (h:min) ¹	Residual moisture (%) ^{1,2}
Cottons 	20	10.0	0.500	95.0	3:39	42.00
Cottons  ³	40	10.0	1.320	95.0	3:30	42.00
Cottons 	60	10.0	2.100	95.0	3:18	42.00
Cottons  +  Pre-wash	40	10.0	1.500	115.0	4:20	42.00
 Cottons Eco  ⁴		10.0	0.840	58.0	3:50	44
 Cottons Eco  ⁴		5.0	0.480	51.0	2:45	44
 Cottons Eco  ⁴		5.0	0.480	51.0	2:45	44
Easy Care  ₃	40	4.0	0.780	45.0	2:29	32.00
Mix 	40	4.0	0.670	42.0	1:00	50.00
Delicates/ Silk 	30	2.0	0.200	34.0	0:37	61.00
 Wool 	30	2.0	0.210	40.0	0:41	27.00

¹ values determined according to the valid version of EN60456

² Information on residual moisture based on programme-dependent spin-speed limit and maximum loads.

³ Information for test institutes: During a test in compliance with the applicable standard EN60456, you must select the maximal possible spin speed.

⁴ Programme setting at maximum speed for testing and energy labelling in accordance with Directive 2010/30/EU with cold water (15 °C). These programmes are suitable for cleaning normally soiled cotton items and are the most efficient in terms of combined energy and water consumption. The stated programme temperature is based on the temperature indicated on the care label for the laundry. The actual washing temperature may differ from the stated programme temperature for energy-saving reasons; the washing performance meets legal requirements.

23 Technical data

Appliance height	84.5 cm
Appliance width	59.8 cm
Appliance depth	59.0 cm
Appliance depth with door closed	64.8 cm
Appliance depth with door open	109.0 cm
Weight	82.6 kg
Maximum load	10.0 kg
Mains voltage	220-240 V, 50 Hz
⚡ Minimum installation protection	10 A
Nominal power	2300 W
Power consumption	<ul style="list-style-type: none"> ▪ Standby mode: 0.20 W ▪ Left-on mode: 0.50 W ▪ Time until the networked standby mode is set (Wi-Fi): 20 mins ▪ Networked standby mode (Wi-Fi): 2.00 W
